

Foundation Phase: Grade 1 - 3

The Two Oceans Aquarium's Education Centre has stimulating programmes designed to complement the work done in schools. Our activities are designed to lead learners to discover and learn about the freshwater, coastal and marine environments. Should you wish your activity to be a different topic we would be happy to discuss your requirements and structure an activity accordingly.

1. Fish lesson

Constructing science knowledge.
How are fish adapted to various environments?
Identification of a few fish species.
Hands on study of external features.
Learning Outcomes : LO 2

2. Underwater wonders lesson

Fascinating encounters with animals without backbones.
A multi-sensory exploration of three fascinating rock pool invertebrates, using Nemo and other cartoon characters as a reference point (anemone, starfish, urchin).
Learning Outcomes : LO 2
