## The Two Oceans Aquarium Environmental Charter

We aim to raise awareness of environmental issues and promote conservation. This is in line with our vision of abundant and healthy oceans and our mission to inspire support for their future well-being. We cannot do this effectively or with credibility if our own operations impact negatively on the environment.

As such we should all lead by example and actively strive to reduce the impact of our activities on the environment.

We are committed to:

- Achieving sound environmental practices across our entire operation
- Complying fully with all environmental legislation
- Minimising our use of energy, water and materials
- Minimising our waste and reducing, recycling and reusing the resources we consume
- Encouraging our staff, volunteers, visitors, suppliers and contractors to participate in our efforts to reduce our impact on the environment
- Working with others in industry, in education, in public agencies and the broader community to achieve wider environmental goals
- Providing all our employees with the training and resources required to meet our objectives
- Communicating our policies and practices to interested parties
- Monitoring and recording our environmental impacts on a regular basis, and having our performance independently audited against our environmental management system
